

Overview

When advocating your position to policymakers, data is an effective tool. Using the data gathered by Centers for Medicare and Medicaid Services (CMS), a respected government source, will bolster the argument that plasma therapies and their recombinant analogs are a minuscule portion of each state's Medicaid budget, often less than 2 percent. Policymakers will appreciate having 'the data and will recognize that timely access to these lifesaving therapies should not be sacrificed to cost-saving initiatives, because these therapies are not the ones driving the escalation in Medicaid costs.

The Medicaid Spending Data charts used in the PPTA State Handbook are created using CMS' annual Medicaid Reimbursement data. These charts are used as a measurement to state levels of usage and the potential threat to plasma protein therapies. CMS compiles the annual Medicaid Reimbursement data and provides downloads (available at: <http://www.cms.hhs.gov/home/MedicaidDrugRebateProgram>). [Note, "Managed Care" (or indirect reimbursement) is not included in this data.]

State Drug Utilization Data

State Medicaid programs are required to report their annual outpatient drug utilization figures to the CMS for each outpatient drug purchased on or after January 1, 1996. The data is stored by individual year and individual state, and can be accessed separately (available at: <http://www.cms.hhs.gov/MedicaidDrugRebateProgram/SDUD/list.asp>).

All data files (in 58-integer database files) are in zipped format and can be downloaded by opening the appropriate year's drop down box and selecting the appropriate state from that .dropdown box. The files must be unzipped after downloading by using extraction software such as WINZIP. [The extracted files are named XXutilYY.txt, (where XX represents the state abbreviation and YY represents the last two digits of the year) and are in ASCII format.] Once the files are downloaded and extracted, they may be imported into Microsoft Access or some other database software. The following fields are present in each record:

Field	No. of Integers	Position	Remarks
State Code	2	1-2	State Abbreviation
Labeler Code	5	3-7	NDC #1
Product Code	4	8-11	NDC #2
Package Size	2	12-13	NDC #3
