

THE **FACTS** ABOUT...

COMMUNITY-BASED DONOR STANDARD

- ▶ Part of a series of rigorous standards created as another layer of safety for donors as well as patients who rely on plasma protein therapies.
- ▶ Donors must provide a valid photo ID and proof of local residence. Experience has shown that donors who live in and are committed to a community are the safest donors.
- ▶ A prospective donor living outside of a defined area in which the plasma center is located is not accepted for donation.
- ▶ Donors with addresses known to be half-way houses, hotels, motels, homeless shelters or missions are not accepted. This is done to help ensure safety and quality of the plasma collected.
- ▶ This Standard helps to ensure a steady and reliable donor population who are members of the community in which the plasma center is located.
