

# THE FACTS ABOUT...

## CROSS DONATION MANAGEMENT STANDARD

- ▶ Underscores the industry's highest concern toward the health and safety of donors.
- ▶ Donors are not allowed to donate too often in order to allow their bodies to replace the lifesaving proteins in the plasma donation.
- ▶ This Standard helps to prevent donors from donating more often than is allowed.
- ▶ Assists plasma collection centers in informing and counseling donors about safe donation practices. Donors who do not comply are permanently deferred.
- ▶ Assists plasma collection centers in informing and counseling donors about safe donation practices. Donors who do not comply are permanently deferred.
- ▶ Works in conjunction with other industry standards, regulations, and procedures to protect donor health and ensure that plasma is of the highest possible quality and safety.
- ▶ Assesses donors and centers to ensure that donations occur within allowable and safe intervals.
